Shed Weight Book

PROPERTY

SEASON

TOTAL NO. BALES

“Please Watch Bale Weights”

Maximum gross weight

The maximum bale weight for wool of all descriptions is 204kg. Bales received over the maximum weight must be adjusted and each bale will incur a charge, which the grower will have to pay. To allow for in shed weight variances bales should not exceed 185kg.

Minimum gross weight

The minimum weight for all descriptions is 110kg, with the exception of specialty wool types, which may have a minimum gross weight of 90kg.

- **Over or underweight bales** cost time and money
- **Over or underweight bales** cause major delays in processing wool for sale
- **Over or underweight bales** are outside the industry and union agreed regulations
- **Over or underweight bales** cause delivery and shipping difficulties. All dumps are not designed to compact overweight bales
- **Overweight bales** cause injury both in shed and throughout the pipeline

There is no advantage of pressing bales outside the industry standards.
